Revolutionizing Military Applications

Custom Designed Solutions Fit for Your Application

At Core Systems, we've pioneered mission-critical systems with ISR capabilities, advanced radar technology. Our multi-domain solutions take your mission to the next level.

Your Mission, Our Expertise
Since 2007, Core Systems has been dedicated to crafting customized solutions for military operations, ensuring excellence from concept to completion. We've developed a diverse range of solutions for every conceivable military application.

Precision in Every Solution
Core Systems leads in military tech with custom solutions exceeding expectations. Our tailored, rugged systems meet your environmental standards in order to provide unmatched reliability in the battlefield.

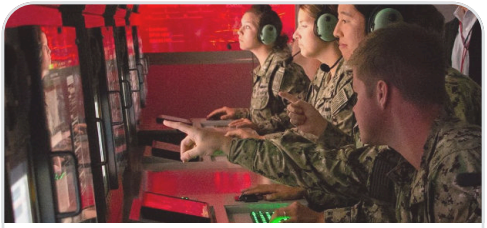
Work with Core Systems for a fusion of innovation and reliability designed to meet the demands of modern military technology

Military Aircraft Systems
Our rugged technology can upgrade almost any aircraft mission.

Training & Simulation
Our systems can be used to simulate battle conditions to prepare soldiers.

ISR
We provide solutions for Intelligence, Surveillance and Reconnaissance (ISR) systems that serve a variety application types.

Joint All-Domain
Our multi-domain solutions can operate independently or together across a mission-critical infrastructure.



Radar
We develop technology that allows radar to track down targets while avoiding the threats of enemy jamming.

EO/IR
Our systems have been used for advanced sensors that renders data for mission improvement.

Land Systems
We develop the most modern and rugged solutions for land forces that are built for any terrain.

UAS
We develop technology that supports unmanned aircraft systems to give your mission the edge on the battlefield.

SIGINT
The modern battle is fought silently through electronic warfare and Core Systems has the technology to keep you up to speed.
